The screenshot displays a dashboard with a sidebar on the left containing navigation icons. The main content area is divided into several sections:

- Backup Status:** Two circular progress indicators both show 100% completion. Below them are two callouts for "ISO 27001" and "SOC2 Compliance", with a "313 OK" indicator.
- Backup Details:** A section titled "Backup with full data coverage" includes a "Restore" button and a row of icons for different backup methods (e.g., GitLab, GitHub, etc.).
- Last Copy:** A section titled "LAST COPY" shows "Repos_Metadata" (5k) backed up "From 1:53 PM" and "Encrypted". Below it, a "RESTORE TO" dropdown menu is set to "GitLab".
- Compliance:** A section at the bottom states "Your regulatory compliance rate" is "100% meet".

World's only backup and Disaster Recovery for DevOps stack

We bring you an all-in-one, automated DevOps backup, security compliance, and every-scenario-ready Disaster Recovery for 360 cyber resilience.

Time-savvy enterprise DevOps backups

Automated backups with the widest DevOps data coverage, on any storage, running on a flexible schedule (or on demand), and policy to secure even the most demanding businesses.

Minimize disruption with #1 Disaster Recovery

Eliminate the chaos due to accidental deletion, ransomware attack, or service downtime with every-scenario-ready Disaster Recovery. Restore to the same or another account (even between self-hosted and the cloud), local machine, or to GitHub, Bitbucket, GitLab, Azure DevOps (and conversely), or between Jira projects.

Security both CTO & CISO can trust

Data residency of choice, in-flight & at rest AES 256 encryption with your key, instant remediation center, unlimited retention, ransomware protection, SLA reports & more features for better security governance and more control. Proven by SOC2 Type II & ISO 27K audits.
